Jeremy Demers

Full Stack Web Developer and Process Automation @ Pfizer
| Computer Vision, Agile Project Management, Agentic AI
Development

Providence County, Rhode Island, United States

Summary

With over 20 years of experience, I have cultivated expertise in full-stack web development, process automation, and applied AI solutions. My most recent role at Pfizer allowed me to contribute to advanced web application development and workflow optimization, leveraging skills in computer vision, agile project management, and Jira. My work is characterized by a focus on building reliable, practical systems that integrate modern software engineering, automation, and AI technologies. I am committed to continuous learning and collaboration, applying my technical knowledge and regulated manufacturing background to deliver impactful solutions.
